VICE-CHANCELLOR'S OBSERVATIONS ON THE ANNUAL REPORT FOR THE SESSION 1983-84.

My observations on the Annual Report of the University for the year 1983-84 are in the form of future visualisations rather than comments upon how the University functioned during the period. Even otherwise it is always better to set future goals in the light of the present potentialities and experiences.

The annual reports serve the purpose of not only consolidating the activities of the year at one place, but also provide an authentic source for future reference. It would be well to write a history of the University since its inception which may contain all information about important landmarks and achievements of this premier University of the State of Rajasthan. Looking back we could see not only where we excelled but also are as where we faltered. It is, however, always the present that has to be exploited to the best possible advantage in shaping the future. The reinforcement of faith in our inherent strength will enable us to steer towards the desired goals.

The present statistics indicate that we have become oversized. The University of Rajasthan has great potentialities and can contribute more significantly in the national development. However, if conducting the examinations and declaring the results in time, which indeed in the present circumstances is in itself a great achievement, were to take away all our time and energy, how could we look deeply into the persisting malaise and take corrective steps specially in regard to updating our curricula, restructuring of courses and undertaking research in areas relevant to the growth and development of the State and the country.

The draft of the new Education Policy is under discussion. We too are organising a seminar next month to discuss the draft. It is hoped that as a result of these discussions on the National Education Policy we would be able to carve our courses more clearly in terms of the over-all National Objectives.

In order to reduce our present size, we owe a duty to suggest to the State Government alternate economical means of meeting the aspirations of growing number of people for higher education. Perhaps, this could be achieved by converting the University of Rajasthan into a Central

University and by setting up two or three new universities in the State. This is only a suggestion which could be debated more seriously to arrive at a consensus ; but of one thing about which I am convinced is that the size of this University has reached a saturation point and the sooner we can do something to improve this situation. the better it will be for the cause of higher education in the State.

I look forward to the cooperation of all the segments of the University community in working for a better tomorrow.

7. UNIVERSITY GUEST HOUSE

The concept of the University Guest House is essentially academic. From the very beginning it has been striving to serve intellectuals, scholars, people of eminence and talented youngsters.

Ideas and efforts are being planned to make the Guest House setting and service in consonance with the academic milieu. All suggestions to make the Guest House an appropriate place for academicians are welcome.

The University has constituted a Guest House Advisory Committee which has helped in proving the functioning of the Gust House. The Guest House has a well furnished dining hall. The reception lounge has been partly renovated by fixing wall paper. Some rooms have been provided with geysers and the dining hall has been provided with curtains. The use of the Guest House has also been allowed to the employees of the University for marriage purposes on payment of nominal charges.

Plans for the extension of the Guest House are under consideration and certain changes in the existing/structure are also contemplated.

Essentially the Guest House staff serves the guests. The old and experienced bearers have cheerfully borne the burden of serving the participants in the Seminars, members of conferences, local parties and "At Homes" of the Department and has selectively catered outside parties also. Foreigners who come from outside India for University business and stay in the Guest House are very much impressed with the service of the Guest House.

The Guest House serves continental and western food to its guests. Efforts are being made to see that Guest House runs on No-Loss No-Profit basis, although the occupancy of the Guest House on year average is 60%.

During the last year under report about 668 guests stayed in the Guest House and it was venue for several Seminars, lectures and Parties.

	—

As there was no whole time Manager for the Press, it was looked after by a part time Officer-in-Charge. The necessity of whole time Manager was seriously felt.

There was no addition to the existing plant and machinery. At present there are seven printing machines. All are in running condition. Besides this there are two Mechanical composing Machines out of which most of the work was turned out by English Machine ; the Russian Machine could not be operated for want of parts etc.

In Binding Section one cutting and one stitching machine is available. All the machines are in working order except minor repairs.

Most of the work entrusted to Press was executed in time. Despite constraints and limitations all possible efforts were made to harness all the resources available.

The difficulty of storing paper, the main rawmaterial was faced. There is no proper storing space for storing paper. This is a felt necessity of having a store room nearby. In Binding Section also there should be one more cutting machine which may relieve the existing machine from the heavy load of work.

16. EXAMINATIONS (1983-84)

1. Result Declaration at a Glance :—

Result declaration at a glance both of the Undergraduate (Table-A) and Post-graduate (Table-B) classes amply illustrates that the session 1983-84 has been the session of insight, forethought, proper planning, coordination, decision making firm determination and concrete achievements. This is also indicative of the remarkable progress made in the declaration of major results. It is worth mentioning that in many of the major results there was not a single case of RL (Result Later).

Besides throwing light on the magnitude of the work undertaken, Table C also indicates the year-to-year increase in work load of the University.

3. Complete computerisation of major undergraduate and postgraduate results introduced in 1982 has now borne fruit. Our university is one of the first to have introduced the modern concept in examination administration with such success.

4. The University administration successfully conducted central evaluation of over 20 lakh answer-books in 1983 and 1984 which made it possible for the University to declare the major results before the beginning of the new session. Contrary to general belief, the net additional expenditure incurred on central evaluation of answer books is insignificant when judged in terms of expenditure versus efficiency, or, for that matter, compared with the commensurate benefit it has yielded. The system was introduced on a large scale for the first time in 1981 but given up in 1982 with disastrous results. It was re-introduced in 1983 and improved and perfected in 1984. The time taken in declaring results (as illustrated in Tables 'A' and 'B' under the caption declaration of result at a glance) has been brought down to the very minimum in 1984. Problem of 'result later' cases has been almost eliminated.

17. UNIVERSITY INSTITUTE OF CORRESPONDENCE STUDIES

The pioneering task of linking the University with the Community was launched under the aegis of the University of Rajasthan a decade and half ago. Set up in 1968 primarily to conduct undergraduate correspondence courses, the Institute started with 313 students in 1969-70 and the number rose to 6791 in 1982-83. The enrolment of students in the session under review (1983-84) was nearly 7,583. The Institute has students from all walks of life, of all age groups and from all parts of the country.

At present the Institute has the following correspondence courses : *M.Com.* in (i) Accountancy and Business Statistics and (ii) Business Administration ; *M.A.* in (i) Economics, (ii) Sociology, (iii) Public Administration, (iv) History (v) Political Science (vi) Hindi ; *B.Ed.* (Summer School-cum-Correspondence Course) ; *Certificate Course* in Library Science ; and *Post-graduate Diplomas* in (i) Tourism and Hotel Management and (ii) Journalism.
